Argan Oil

Argan oil is an extract produced from the kernels of the Argan tree (*Argania Spinosa*), which only grows in parts of Morocco.

Argan oil is cold pressed in the traditional manner.

Argan oil is also called „Moroccan gold“. Due to its composition is considered a miracle of nature.

Argan oil contains 80% unsaturated fatty acids (omega 3 and omega 6) which helps to nourish and soften the skin. Unsaturated fatty acids together with phytosterols help to maintain a sufficient amount of collagen in the skin and therefore prevent drying and withering of the skin.

Because of fat soluble vitamin E it also has a strong antioxidant properties protecting the skin from harmful free radicals, thereby slowing down the skin's aging process associated with wrinkle formation.

Argan Oil contains unique components such as squalenes, carotenoids, sterols and polyphenols.

Due to its composition there are the following cosmetic properties attributed to argan oil such as anti-inflammatory, healing and strong anti-aging effects.

Skin Care – Hydration

Argan oil is most commonly used for skin regeneration. Due to its high content of vitamin E maintains collagen in the skin and leaves the skin supple and soft.

Hair Care

It is proven that Argan oil makes hair softer, shinier and silkier. It can even help to treat damaged, frayed, brittle hair ends and tame frizzy hair. Relieves itchy irritated scalp. It is recommended to apply for 30 minutes as a wrap on a head.

Anti-Aging

Argan oil gives the skin a youthful and healthy look and reduce the visibility of wrinkles. For its antioxidant effect is argan oil considered as one of the most effective anti-aging products. It restores skin elasticity and leaves skin feeling more plumper and softer.

Dry Skin Care

Argan oil as excellent source of vitamin E and unsaturated fatty acids helps regenerate damaged skin. The nutrients in Argan Oil may help prevent skin dryness and irritation. Suitable for the treatment of eczema and psoriasis.

Acne

Argan oil promote healing and assist in soothing afflicted skin. Acne is often the result of oily skin. Argan oil is non greasy and non oily and therefore helps to balance the skin. It provides natural moisture. The presence of antioxidants in Argan oil helps heal damaged skin cells and reduce inflammation. Argan oil works to balance the sebum production and is natural solutions for oily and acne prone skin.

Foot Treatment

Argan oil reduces the risk of ingrown hairs after depilation. Its regular application on the feet to decrease the occurrence of crusty and chapped skin. Argan oil can also be used to accelerate healing process.

Stretch marks, cellulite, scars

Argan oil with its high content of vitamin E prevents and reduces the appearance of stretch marks (pregnancy, adolescent growth, drastic fluctuations in weight). It helps improve the condition of both new and old scars. Argan oil is ideal massage oil to fight against cellulite.

Hand and Nail Treatment

Regular care of hands and nails with argan oil is to strengthen nails and reduce nail fraying and brittleness. It is ideal product for dry and cracked skin on the hands leaving the skin supple.

Lip care

Argan oil is an ideal product to protect lips from extreme weather, not only in summer but also in winter. Promotes healing and regeneration of dry, cracked lips and lips afflicted with oral herpes.
